

Westinghouse

ISOLATION SWITCH

CE

Leading The Future of Electrification

- A Global Heritage Brand with 130 Years of Product Innovation
- Perfect Products, Creative Services, and Competitive Price

**Since 1886,
Westinghouse
Has Brought
The Best
To Life.**

Westinghouse remains a trusted name globally in consumer and industrial products. Built on a heritage of innovation and entrepreneurial spirit, Westinghouse products were the first to supply the United States with AC electric power, transmit a commercial radio broadcast and capture man's first step on the moon. Today, Westinghouse continues to grow its diverse portfolio with a wide range of product categories that include home appliances, consumer electronics, lighting and power generation.

ISOLATION SWITCH

WRDGL Series

Product Description

WRDGL series

isolation switch adopts modular design structure and glass fiber reinforced unsaturated polyester resin casing. It has very high dielectric property, and suitable for safe operation. The operation mechanism is a spring-accumulating and accelerating instant-release device, which makes instant making and breaking of the double gap contact. It is no relationship with the speed of operation handle.

The product has complied to IEC 60947-3.

Model

WRD GL ☐ - ☐ A / ☐ K ☐ B ☐

①	Model (WRD)
②	Load isolation switch code (GL)
③	C side operation; Z Outlet; Z2 Inlet
④	Conventional thermal current
⑤	Number of Pole: 3 poles; 4 poles (poles+on and off neutral pole)
⑥	The window for direct observing the contact. Donot need not to note.
⑦	Functional code of auxiliary contact (Attached table).Donot need not to note.
⑧	The connection behind the plate, Donot note if connection in front of plate.
⑨	J operation outside of the board; H operation behind of the board.Donot need not to note.

One NO One NC	F11	F1NO+F1NC
Two NO Two NC	F22	F2NO+F2NC

Characteristics

- Spring-storage instantaneous release of the mechanism to speed up the realization of the rapid marking and breaking (13.8 m / s), and it is nothing to do with the operation handle speed and have greatly improved the capability of extinguish electric arc.
- The glass fiber reinforced unsaturated polyester resin casing have excellent flame resistance, dielectric, resist carbonic and resist impact performances.
- Parallel double gap contact possesses self-cleaning functions.
- All the contact materials are copper alloy plated with silver, and possess two separation contact surfaces.
- Large clearance of insulation.
- When it is "0" position, the product can lock the handle with three locks at the same time, and it can avoid error operation.

WRDGL Series

General

WRDGL series load isolation switch is applicable for AC 50/60Hz, rated voltage AC 660V and below, DC 440V and below, rated current up to 3150A.

Standard

IEC 60947-1(2016)

IEC 60947-3(2016)

Operation Environment

Altitude not exceed 2000m

- Temperature: $-5^{\circ}\text{C} \sim +50^{\circ}\text{C}$, Relative humidity not more than 95%
- No explosive dangerous medium environment

Performance Feature

- 7 Frames of WRDGL series load isolation switch from 63A to 3150A is basic model of modularized design type, have 3 poles and 4 poles.
- The mark window is in the front to indicate the on and off state.
- For winder style, refer to the back operation load isolation switch WRDGL-160A-1600A/H
- Two group of auxiliary contacts can be Provided.
- The Terminal insulating cover can be Provided.

WRDGLC Series (Side Operation)

WRDGLC-160A-1600A Side Operation Load Isolating Switch

- WRDGLC-160A-1600A is applied for the circuit making and breaking or electric insulation. It has three poles and four poles (three poles + on and off neutral pole), and switches over 1000A are only suitable for electric isolation.
- The product with observation window can be provided according to the demand to observe directly the on and off state of contact.
- Mode of operation:
Direct operation: handle is installed on the right side of switch
Operation outside: handle is installed outside the door of power distribution board.
- Two groups of auxiliary contacts can be assembled.
- Extended shaft is used for the operation outside the board.
- Mechanical performance and electrical performance are correspond to WRDGL-160A-1600A property
- The cable insulating cover can be assembled.

WRDGLZ Series (Changeover)

WRDGLZ-125-3150A Changeover Load Isolation Switch

- WRDGLZ-125-3150A is applied to changeover two groups of low voltage electric circuit or two groups of load devices or safety isolation.
- Mode of operation:
Direct operation: handle is installed on the switch
Operation outside: handle is installed outside the door of power distribution board.
- The product with observation window can be provided according to the demand to observe directly the on and off state of contact.
- It have three poles and four poles (three poles + on and off neutral pole)
- Two groups of auxiliary contacts can be assembled.
- Extended shaft is used for the operation outside the board.
- Mechanical performance and electrical performance are correspond to WRDGL-125A-3150A property.
- The bridge connecting conductor can provided to connect the inlet or outlet terminals of the switch.

Note: The bridge connection is chosen, and it need to indicate the inlet or outlet connection with it.

WRDGLR Series

WRDGLR Series Fuse Group Of Isolation Switch

WRDGLR series fuse group of isolation switch (called as switch for short) is a kind of multi-poles manual operation switch, adopting the glass fiber reinforced unsaturated polyester resin casing, having high dielectric performance, protective capability and safe operation.

The operation mechanism is a spring-accumulating and accelerating instant-release device, which makes instant making and breaking of the double gap contact. It is no relationship with the speed of operation handle.

It is strong humidity and resistant properties.

Model

①	Company Code
②	Load isolation switch code
③	Rated current
④	Number of Pole: 3 poles; 4 poles (poles + on and off neutral pole)
⑤	Rated current for fuse-link
⑥	Side operation, no note for front operation.
⑦	Operation outside board, standard extended shaft 330mm. Mark after J with special requirements, no note for internal operation.
⑧	Auxiliary contact
⑨	Connection at back. Connection in front of board is not marked.
⑩	Form: I modular (160A-400A) II Integrated (400A-630A)

Note: F NC or NO auxiliary contact.

S NC + NO S type auxiliary contact.

U-U type auxiliary contact.

Fuse-Link Specification

Rated current for fuse group of isolation switch(A)	Rated current for fuse-link(A)	Fuse-link model
63	10, 20, 30, 40, 50, 63	00C
160	63, 80, 100, 125, 160	00
250	160	0
	200, 250	1
400	300, 315, 400	2
630	400, 500, 630	3

WRDGLR Series

WRDGLR-63A -630A/I Type Fuse Group of Isolation Switch

WRDGLR-63A type is of modular design structure.

Ensure load making and breaking and reliable over current and short circuit protection. Obviously visible off state. It have 2 poles, 3 poles and 4 poles (3 poles and on and off neutral pole). Total 18 specifications from 63A-630A.

WRDGLR Structure and Operation Modes

- Front direct operation: The handle is installed in the front of switch.
- Side direct operation: The handle is installed on the right side of switch.
- Front operation outside the board: The handle is installed in the front of distribution board door.
- Side operation outside the board: The handle is installed on the right side of the distribution board.

OUR PROMISE

Westinghouse is built upon a tradition of dependability and innovation.

Today, we strive to make everyday life a little better by offering a wide range of quality products and services you can trust.

WHY WESTINGHOUSE ?

Since 1886, Westinghouse has brought the best to life. Today, Westinghouse Electric Corporation remains a trusted name globally in consumer and industrial products. Built on a heritage of innovation and entrepreneurial spirit. Today, Westinghouse continues to grow its diverse portfolio, which includes a wide range of product categories, including home appliances, consumer electronics. Lighting and power generation.
