Leading The Future of Electrification

- A Global Heritage Brand with 130 Years of Product Innovation
- Perfect Products, Creative Services, and Competitive Price

**Since 1886,
Westinghouse
Has Brought
The Best
To Life.**

Westinghouse remains a trusted name globally in consumer and industrial products. Built on a heritage of innovation and entrepreneurial spirit, Westinghouse products were the first to supply the United States with AC electric power, transmit a commercial radio broadcast and capture man's first step on the moon. Today, Westinghouse continues to grow its diverse portfolio with a wide range of product categories that include home appliances, consumer electronics, lighting and power generation.

Alpha Plus Switchgear & Control Gear System

4

SwitchBoard

General Features:

- form 3 / form 4 series is a metal clad compartmentalized switchboard with each feeder units enclosed inside a separate metallic compartment.
- These boards are available in various depths and heights to suit the individual project requirements.
- Protection Class Up to IP – 54
- Cubicles are made out of 2.0mm thick Electro-galvanized sheet steel as standard for outer covers and doors. 1mm thick sheet steel for internal partitions.
- Busbar Chamber of 300mm height is provided at the Top or Bottom as per project specifications.
- Removable Rear covers are provided.
- Doors have Semi-concealed hinges and locks.
- M 12 Lifting Eye Bolts are provided on top of each cubicle.
- All cubicles are powder coated to RAL 7032 – Textured.
- All doors are provided with gaskets for IP54 degree of protection.

Incoming Section:

- Separate compartments are provided for instruments, ACB and the incoming cabling.
- The Instrument compartment has separate doors for KWh meter and instruments.
- The ACB compartment has a hinged door. Outgoing Section:
- Outgoing enclosures are provided with compartments of minimum 200mm height in multiples of 25mm.
- Each compartment has removable side module covers, Rear mounting plate, Base plate and a hinged door.
- Vertical Bus Bar chamber column of 300mm width will provided for feeder columns.
- Cable alleys can be provided either for front or rear access cabling for all outgoing feeder compartments.

Alpha Plus Switchgear & Control Gear System

- Westinghouse provides an extensive low voltage electrical equipment package to
- cover most applications. Due to the adaptability of Westinghouse is modular
- systems, many of the equipment or systems can easily be supplied and
- integrated in the same enclosure. Westinghouse offers the complete range form
- packaged sub-stations main boards with nominal ratings from 800A to 6400A.
- Incoming feeder sections and bus-coupler arrangements are available for rated
- current up to 6400A. Full flexibility of choice is offered in the selection of
- electrical equipment with regard to brand, make and type of breakers for fixed,
- withdrawal, etc. Rating Table- Type- TESTED Range of Assemblies (TTA)*

Rating Table- Type-Tested Range of Assemblies (TTA)*

- All Westinghouse L.V. Switchgear has been fully type- tested according to specifications and
- requirements of latest IEC 61439-1 & 2.it conforms to major markets specification in
- the world.

Alpha Plus Switchgear & Control Gear System

The following tests have been successfully carried out at independent test laboratories by ASTA & KEMA. Further specific tests are also performed and verified by local testing body like PSB (Productivity and Standards Board of Singapore) for some local installations:

- Verification of temperature-rise limits
- Verification of dielectric properties
- Verification of short-circuit withstand strength
- Verification of the effectiveness of protective circuit
- Verification of the clearances and creepage distances
- Verification of mechanical operation
- Verification of degree of protection
- Verification of electromagnetic compatibility
- Verification of the resistance of insulating material to abnormal heat and fire

The busbar system and its operating temperature is designed and tested for below 80 degree temp rise i.e. 80K for both vertical and horizontal placements of breakers in both direct and reverse feeding, and ingress protection up to IP43, complete Switchgear is certified for for FDB, SMDB, IP54 for MDB. electromagnetic compatibility by ASTA & KEMA. Certification services.

Rating Table-Tested Range of Assemblies (TTA)*

Rated current	Short time withstand (Icw)	Configuration
800 Amp	50/1 secs	Single support
1250 Amp	50/1 secs	Single support
1600 Amp	50 / 3 secs and 80/1 secs	Single support
2500 Amp	65/1 secs	Single support
2000 Amp	65/3 secs	Single support
3200 Amp	80/1 secs	Single support
4000 Amp	80/1 secs	Single support
5000 Amp	80/1 secs	Single support
6400 Amp	100/1 secs	Single support

*Updated at the time of publication. Please contact us for an updated list.

Busbar

Tinned copper with 100% full-sized neutral (no matt-black copper is used within board)

Finishing

Powder coated texture finishing to RAL 7032 (light beige). A wide choice of colours is also available upon request.

Forms of Separation

Form 2, 3 & 4 constructions up to Form 4 - Type 7-

Entry

Top and bottom cable and busduct entry with removable cable entry gland plates or insulated boards.

HANDLING AND INSTALLATION

Handling

- Handling the structures by rollers. It is applicable only with plinths.

- For the panels which has depth up to 250 mm, following type handling is recommended:

- During transport with a forklift it is advisable to tie the panel with rope.

- For the structures with busbar compartment, check the center of gravity before handling.

Handling with Crane

- Handle using a crane, check the following conditions before lifting the panel.
- Excellent positioning of the ropes or chains;
- The angle between the lifting ropes and the panel roof must be $\geq 45^\circ$;
- Maximum 3 columns can be transported
- While handling several columns side by side above conditions must be applied

DIN 580 Standard regarding mechanical connection elements (only for lifting eyebolts)

Lifting eyebolts

Lifting reinforcements

Alpha Plus MCB & MCCB Distribution Boards System

CE

Alpha Plus Three Phase MCCB Panel Distribution Board 800-1250A Ki Series

- Assembly complies with IEC 61439-1,2
- ASTA Certified withstand short circuit 50kA for 1 sec & 35kA for 3 sec.
- Current rating tested up to 1250A.
- Ingress protection to IP54 is standard to IEC 60529
- Fully Insulated tin plated copper busbars, fully braced and supported
- High quality epoxy powder paint finish RAL 7032
- Dead front cover available behind the doors for additional protection
- Branch breakers up to 800A
- Floor free standing sheet steel enclosure with 2mm thickness
- Flat removable gland plates for easy drilling and cable access
- Generous cabling area with two standard sizes throughout the range

Alpha Plus MCCB Distribution Boards Series (Ci,Gi,Fi)

4

SwitchBoard

Specification

- 250A, 400A, & 630A Panel Board versions are available.
- 2 to 18 outgoing ways.
- Outgoing breaker's up to 250Amp MCCB.
- Ingress protection up to IP43 with standard IEC 60529.
- ASTA certificate fully Type-Tested to standard 61439-1,2 & 3.
- One piece tin-plated copper busbars with full Bracing.
- Flat removable gland plates make drilling and access easier.
- Metering options.
- Reliable & safe or Top & Bottom extension modules provide improved access for larger cables.
- Versatile solution, accommodating different size outgoing breakers to meet much application needs.
- Enhanced safety through fully shrouded incoming devices, to protect against contact with live parts.
- Blanking plates finger protect unused outgoing ways.
- Frequency 50/60Hz

Alpha Plus MCCB Distribution Boards Series (Fi Series) Three Phase 630 Amp

4

SwitchBoard

Combining robust high quality engineering with the latest international construction, testing and installations standard, Gi range of distribution boards has been design consultants, to meet the requirement of contractors, users and distributors.

Specification

- The 630 Amp assembly complies with IEC 61439-1,2 & 3.
- Type-tested to the latest standard complete with the full type-tests.
- Tested and rated at full load 630A with NO de-rating on the main busbar.
- Ingress protection up to IP43 standard to IEC 60529
- ASTA certified short circuit level of 35kA rms for 1 second and 25kA rms for 3 seconds.
- Flat removable gland plates make drilling and access easier.
- External and internal earthing points are provided.
- Simple busbar design with maximum reliability, available in outgoing ratings up to 225 Amps MCCBs.
- Generous cabling area throughout the range.
- 1.5 mm sheet steel thickness.
- Frequency 50/60Hz

Alpha Plus MCCB Distribution Boards Series (Gi Series) Three Phase 400 Amp

4

SwitchBoard

Combining robust high quality engineering with the latest international construction, testing and installations standard, Gi range of distribution boards has been design consultants, to meet the requirement of contractors, users and distributors.

Specification

- The 400 Amp assembly complies with IEC 61439-1,2 & 3.
- Type-tested to the latest standard complete with the full type-tests.
- Tested and rated at full load 400A with NO de-rating on the main busbar.
- Ingress protection up to IP43 standard to IEC 60529
- ASTA certified short circuit level of 35kA rms for 1 second and 25kA rms for 3 seconds.
- Flat removable gland plates make drilling and access easier.
- External and internal earthing points are provided.
- Simple busbar design with maximum reliability, available in outgoing ratings up to 225 Amps MCCBs.
- Generous cabling area throughout the range.
- 1.5 mm sheet steel thickness.
- Frequency 50/60Hz

Alpha Plus MCCB Distribution Boards Series (Ci Series) Three Phase 250 Amp

4

SwitchBoard

Combining robust high quality engineering with the latest international construction, testing and installations standard, Ci range of distribution boards has been design consultants, to meet the requirement of contractors, users and distributors.

Specification

- The 250 Amp assembly complies with IEC 61439-1,2 & 3.
- Type-tested to the latest standard complete with the full type-tests.
- Main busbar is tested and rate
- d at full load 250 Amp with No de-rating on the main busbar.
- Ingress protection up to IP43 standard to IEC 60529
- ASTA certified short circuit level of 35k A rms for 1 sec and 25kA for 3 sec.
- Flat removable gland plates make drilling and access easier.
- External and internal earthing points are provided.
- Simple busbar design with maximum reliability.
- Generous cabling area throughout the range.
- 1.5 mm sheet steel thickness.
- Frequency 50/60Hz

Alpha Plus Panel Distribution Boards Dimensions & Accessories Series (Ci,Gi,Fi)

Extension Boxes for MCCB FIY ,F, J, K, Incomer

- To be used for additional cable space.
- To be used for the installation of additional control, metering or power components.
- Epoxy polyester powder paint finish RAL 7032.
- 1.5mm sheet steel thickness.
- Easy to install.
- Removable front & bottom plate for direct access.
- Add "M" at the part number of standard metering is required.

Alpha Plus Three Phase MCB Distribution Boards (Final DB) Bi Series

4

SwitchBoard

Combining robust high quality engineering with the latest international construction, test and installations standard, Westinghouse Bi range of distribution boards has been designed with advice from consultants, contractors, users and distributors.

- The 200 Amp max incoming DB assembly complies with IEC 61439-1 & 2.
- ASTA certified fully type-tested to standard IEC 61439-1 & 2.
- Main busbar is tested and rated at full load 200 Amp.
- Ingress protection up to IP43 with standard to IEC 60529.
- High quality epoxy polyester powder paint finish in two-tone finishing.
- Flat removable gland plates make drilling and access easier
- The modular design allows for many combinations of incomers, allowing great customer choice increased stocking flexibility.
- The wide range of incoming option includes:
 - MCB or RCCB up to 100 Amp.
 - Switch disconnector up to 125 Amp.
 - MCCB and Moulded Case Switches up to 200 Amp.
- External and internal earthing points are provided.
- Generous cabling area throughout the range.
- 1.5/1.2 mm sheet steel thickness.
- Frequency 50/60Hz

Alpha Plus Row Type Distribution Board

4

SwitchBoard

Combining robust high quality engineering with the latest international construction, testing and installations standard, Row Type range of distribution boards has been design to meet the requirement of consultants, contractors, users and distributors.

Specification

- Compact modular design.
- Easy to install and safe for end- user.
- High quality and corrosion resistant.
- To be used for DIN rail power control components.
- 1.2mm sheet thickness
- Epoxy polyester powder paint finish RAL 7032.
- Cover door is supplied by lock for more safety.
- Surface and flush mounted design.
- The degree of protection IP41 as per IEC 529 and NEMA.
- The row capacity is 16 modules or 24 modules as option.
- Suitable for housing and industrial and commercial application
- Frequency 50/60Hz
